

ETHAN PETERSON

GAME PROGRAMMER & DESIGNER

Gilbert, AZ · 602-849-1101 · epeterson3136@gmail.com · [akuro.studio](#) · [github.com/KodaNotABear](#)

Game programmer with a B.S. in Computer Science (Arizona State University, May 2026) and nine months of professional Unity experience shipping onboarding, LiveOps, and WebGL features for a live mobile racing game. Three years building embedded race telemetry for a collegiate FSAE team. Currently building **Black Signal**, an original first-person horror game in Unity. Seeking a junior game programmer role.

EXPERIENCE

Game Development Intern

Aug 2025 – May 2026

Pixel Pirate Studio · Off-Road Champion (mobile racing, Unity)

- Designed and implemented the new-player onboarding system, guiding players through core mechanics and progression goals in their first session
- Shipped a tournament update where players compete for virtual currency, connected to a web portal for live standings and rewards
- Ported Off-Road Champion to WebGL for browser play
- Collaborated with designers and producers in an Agile team across daily standups, sprint planning, and code review

Founder & Solo Developer

2025 – Present

AKURO STUDIO

- Developing **Black Signal**, a first-person horror game in Unity (C#) set on a derelict space station, where the player explores on foot and flags anomalies while sensors and onboard tasks compete for attention
- Building all of its gameplay, anomaly, and sensor systems, UI, and level design as the sole developer

Data Acquisition Developer

Jun 2022 – 2025

Sun Devil Motorsports (Formula SAE), Arizona State University

- Designed and tested on-vehicle data acquisition tools across three race seasons
- Built embedded systems for live telemetry capture, including an infrared lap timing system used for on-track performance analysis
- Integrated data systems across mechanical and electrical sub-teams

SKILLS

Languages: C# (Unity) · C++ · Java · Python · JavaScript / React · HTML & CSS

Engines & Tools: Unity (3+ years) · Git / GitHub · Blender · FMOD · JetBrains Rider · Visual Studio

Game Development: Gameplay systems · UI implementation · Level design · WebGL builds · Onboarding / LiveOps

Engineering: Embedded systems · Data acquisition · Game servers (Docker / VPS) · Agile / Scrum

EDUCATION

B.S. Computer Science, Software Engineering Focus

May 2026

Arizona State University

- Coursework: Game Development, Computer Graphics, Data Structures & Algorithms, Operating Systems, Software Engineering
- Activities: Formula SAE (Sun Devil Motorsports, 2022–2025) · Software Developers Association (SoDA)
