

ETHAN PETERSON

SOFTWARE ENGINEER

Gilbert, AZ · 602-849-1101 · epeterson3136@gmail.com · [akuro.studio](#) · [github.com/KodaNotABear](#)

Software engineer with a B.S. in Computer Science (Arizona State University, May 2026) and nine months of professional experience shipping features for a live Unity mobile game and its companion web portal. Comfortable across the stack: C# / .NET services, React front ends, Python tooling, and self-hosted Docker deployments. Seeking a junior software engineer role.

EXPERIENCE

Game Development Intern

Aug 2025 – May 2026

Pixel Pirate Studio · Off-Road Champion (mobile racing, Unity)

- Shipped a tournament update where players compete for virtual currency, connected to a web portal for live standings and rewards
- Designed and implemented the new-player onboarding system, guiding players through core mechanics and progression goals in their first session
- Ported Off-Road Champion to WebGL for browser play
- Collaborated with designers and producers in an Agile team across daily standups, sprint planning, and code review

Data Acquisition Developer

Jun 2022 – 2025

Sun Devil Motorsports (Formula SAE), Arizona State University

- Designed and tested embedded on-vehicle data acquisition and telemetry tools across three race seasons, including an infrared lap timing system

Founder & Solo Developer

2025 – Present

AKURO STUDIO

- Designing and prototyping **Black Signal**, an original first-person horror game in Unity (C#), as the sole developer

PROJECTS

League Stats Portal

Spring 2026

Class project, Arizona State University

- C# / ASP.NET web app for League of Legends stats lookup, backed by a WCF service layer over the **Riot Games API**: Riot ID lookup, total champion mastery, and last-match stats
- Implemented member and staff login flows with reCAPTCHA verification, sessions, and cookies

Vanilla Extended: Minecraft Modpack & Server

2025 – Present

Personal project

- Curate and operate a 400+ mod NeoForge pack on a dedicated server, self-hosted with Docker on a VPS; wrote custom datapacks, KubeJS scripts, and Python tooling that decodes spark profiler captures for frame-time analysis

akuro.studio

2026

Personal site

- React 19 + Vite portfolio with build-time art generation, deployed to GitHub Pages through a GitHub Actions CI pipeline

SKILLS

Languages: C# (.NET, Unity) · JavaScript / React · Python · Java · C++ · HTML & CSS

Web & Services: ASP.NET · WCF · REST APIs · Vite · GitHub Actions CI

Infrastructure: Docker · Linux VPS · Game server hosting · Git / GitHub

Practices: Agile / Scrum · Code review · Embedded systems · Data acquisition

EDUCATION

B.S. Computer Science, Software Engineering Focus

May 2026

Arizona State University

- Coursework: Game Development, Computer Graphics, Algorithms, Operating Systems · Activities: Formula SAE · SoDA
