

# ETHAN PETERSON

## GAME PROGRAMMER & DESIGNER

Gilbert, AZ · 602-849-1101 · epeterson3136@gmail.com · [akuro.studio](#) · [github.com/KodaNotABear](#)

---

Game programmer with a B.S. in Computer Science (Arizona State University, May 2026) and nine months of professional Unity experience shipping onboarding, LiveOps, and WebGL features for a live mobile racing game. Three years building embedded race telemetry for a collegiate FSAE team. Currently prototyping **Black Signal**, an original first-person horror game in Unity. Seeking a junior game programmer role.

## EXPERIENCE

---

### Game Development Intern

Aug 2025 – May 2026

*Pixel Pirate Studio · Off-Road Champion (mobile racing, Unity)*

- Designed and implemented the new-player onboarding system, guiding players through core mechanics and progression goals in their first session
- Shipped a tournament update where players compete for virtual currency, connected to a web portal for live standings and rewards
- Ported Off-Road Champion to WebGL for browser play
- Collaborated with designers and producers in an Agile team across daily standups, sprint planning, and code review

### Founder & Solo Developer

2025 – Present

*AKURO STUDIO*

- Developing **Black Signal**, a first-person horror game in Unity (C#) set on a derelict space station; designing and prototyping the core loop, UI, and level layout as the sole developer

### Data Acquisition Developer

Jun 2022 – 2025

*Sun Devil Motorsports (Formula SAE), Arizona State University*

- Designed and tested on-vehicle data acquisition tools across three race seasons
- Built embedded systems for live telemetry capture, including an infrared lap timing system used for on-track performance analysis

## PROJECTS

---

### League Stats Portal

Spring 2026

*Class project, Arizona State University*

- C# / ASP.NET web app for League of Legends stats lookup, backed by a WCF service layer over the **Riot Games API**: Riot ID lookup, total champion mastery, and last-match stats
- Implemented member and staff login flows with reCAPTCHA verification, sessions, and cookies

### Vanilla Extended: Minecraft Modpack & Server

2025 – Present

*Personal project*

- Curate and operate a 400+ mod NeoForge pack on a dedicated server, self-hosted with Docker on a VPS; wrote custom datapacks, KubeJS scripts, and Python tooling that decodes spark profiler captures for frame-time analysis

## SKILLS

---

**Languages:** C# (Unity, ASP.NET) · C++ · Java · Python · JavaScript / React · HTML & CSS

**Engines & Tools:** Unity (3+ years) · Git / GitHub · Blender · FMOD · JetBrains Rider · Visual Studio

**Game Development:** Gameplay systems · UI implementation · Level design · WebGL builds · Onboarding / LiveOps

**Engineering:** Embedded systems · Data acquisition · Game servers (Docker / VPS) · Agile / Scrum

## EDUCATION

---

### B.S. Computer Science, Software Engineering Focus

May 2026

*Arizona State University*

- Coursework: Game Development, Computer Graphics, Algorithms, Operating Systems · Activities: Formula SAE · SoDA
